

Amber Li

DESIGN ENGINEER

xiaoyanabl@gmail.com · abllll.github.io/Portfolio · linkedin.com/in/xiaoyan-amber-li · GitHub · Singapore · Open to remote

Multidisciplinary designer working across interface design and front-end implementation — from Figma to functional code. Builds React/TypeScript products across desktop, mobile, and web, backed by five years of enterprise design delivery.

SKILLS

Design

- Figma — interface design, typography, layout
- Design systems and component thinking

Build

- React · TypeScript
- Tailwind CSS · Radix UI
- React Native / Expo · Vite
- Tauri (Rust) desktop shells
- Vanilla JS · HTML / CSS
- Unit testing (Node)
- Git / GitHub

AI-Assisted Development

- Claude Code · Cursor · Codex
- Spec-first — plan, build, then read and correct generated code

EDUCATION

BA (Hons) Spatial Design

1st Class Honours

Lasalle College of the Arts, Singapore · 2017–2020

Dip. Sustainable Urban Design & Engineering

Ngee Ann Polytechnic, Singapore · 2012–2015

LANGUAGES

Mandarin Native
English Fluent

SELECTED PROJECTS

Bonheur — Personal reflection and pattern-discovery app

React Native · Expo

- Designed and built an app for capturing up to three daily “Sparks,” then looking across time to discover what consistently makes the user feel alive.
- Built a low-friction capture-to-reflection flow with mixed-media editing, a day carousel, and a 3D Yearly Review prototype for exploring recurring themes.

Tide — Desktop companion app

Tauri (Rust) · React 19 · TypeScript · Vite · Tailwind CSS · Radix UI

- Built a desktop app end-to-end — native shell, file handling, local media prep — for preparing offline audio and syncing it to a waterproof player.
- Treated motion as a functional signal, not decoration — a waterline visualization reports preparation and sync progress in real time.

Berber Lab — AI jewellery shopping prototype

Hugo · Vanilla JavaScript · Node test runner

- Designed and built a visual-first shopping journey spanning product discovery, simulated AI try-on, saved looks, cart, and mock checkout.
- Implemented and unit-tested client-side cart and try-on state; used Canvas to composite downloadable previews from prepared model and jewellery assets.

EXPERIENCE

Siren Design Group

Jan 2025 – Present

Design & Process Improvement · Singapore

- Support client engagement and design delivery, contributing AI-enabled workflow improvements and facilitating stakeholder discussions across cross-functional teams.
- Led integration of digital tools into design workflows, improving transparency across regional teams.

M Moser Associates

Jan 2023 – Dec 2024

Workplace Design, Enterprise Clients · Singapore

- Owned end-to-end design delivery for enterprise projects valued SGD 500K–5M, translating complex stakeholder requirements into scalable systems.

Axospace — Independent AI/CRM project

2022

FARM

2020 – 2021

Architectural Designer · Design, documentation, and client presentations.
